Water

Stop paying for Air!

Reduce your water bill.

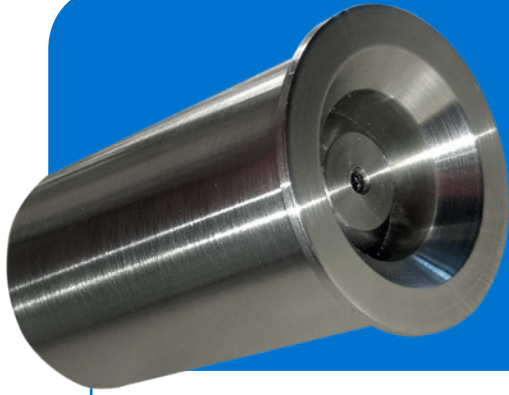

W A T E R C O N T R O L S Y S T E M

Our W valve was developed by our team of experts who have been managers of aqueducts and hydraulic systems in the world (Israel, India, Argentina, Colombia, etc.), Our valve does not reduce significantly the flow needed for the user. We are fully committed to guarantee the performance of the W-Valve. Therefore, we guarantee a minimum reduction of 10%, of what you were invoiced until the date that our product is installed

Our valve is more resistant to challenging hydraulic conditions since it is constructed with stainless steel 316. In addition, stainless steel is certified to be used in potable water. We provide technical support from our team of experts with over 30 years of experience in the public sector and specialized in the reduction of unaccounted waters.

What type of businesses will benefit of the W-Valve
